Dear Murray:

**NOVA GAS TRANSMISSION LTD. (NGTL)  
TOLLS, TARIFF, FACILITIES AND PROCEDURES COMMITTEE (TTFP)  
RESOLUTION T2007-04 – CO<sub>2</sub> MANAGEMENT SERVICE REVIEW  
APPLICATION NO 1579345  
PROCEEDING ID. 89**

The Alberta Utilities Commission (AUC or Commission) acknowledges receipt of Application No. 1579345 regarding TTFP resolution T2007-04 – CO<sub>2</sub> Management Service Review (the Application). The Application was reviewed by way of a written process with Notice being issued August 15, 2008. The following parties submitted Statements of Intent to Participate (SIPs) by the deadline of August 15, 2008: BP Canada Energy Company, EnCana Corporation, Nexen Marketing, and Office of the Utilities Consumer Advocate. The SIPs filed by the parties did not contain any objection to the Application. The Application was reviewed following Information Responses from NGTL to questions from the Commission.

Upon review of the Application and the information responses it became apparent to the Commission that the changes proposed in the Application affect only the inputs to the methodology used to calculate the rates applied to CO<sub>2</sub> service. As the Application results in changes to neither the previously approved rates nor the terms and conditions of service, no approval is required from the Commission at this time. The AUC will review the impact of this resolution when NGTL next applies for changes to its Rates, Tolls and Charges, expected in November or early December 2008.

If NGTL requires the Commission to consider granting explicit approval of the detailed methodology and the source of the inputs to that methodology, a separate application incorporating the methodology into the tariff language should be submitted to the Commission.

The Commission considers that no further action is required with respect to the Application and is closing its file on the matter.
