Filed Electronically

Attention: Mr. Don Popowich
Application Officer

Dear Sir:

**Re: NOVA Gas Transmission Ltd. (“NGTL”)
Carbon Dioxide (“CO₂”) Management Service (“CO₂ Service”)
Semi-annual CO₂ Service Report
Application No. 1253457; File No. 1607-2**

In accordance with Decision 2002-084, issued by the Alberta Energy and Utilities Board (“Board”) on September 24, 2002, NGTL is filing the semi-annual CO₂ Service report. Under Section 5.4 of the CO₂ Service Application, NGTL committed to recording and electronically posting on a monthly basis, the amount of CO₂ on the Alberta System, the aggregate amount of Excess CO₂¹ received by NGTL, and the aggregate amount of CO₂ removed under the CO₂ Service and reporting this information on a semi-annual basis to the Tolls, Tariff and Procedures Committee (“TTP”), predecessor to the Tolls, Tariff, Facilities and Procedures Committee (“TTFP”) and the Board.

Attachment 1 to this letter is a table that provides the monthly average level of CO₂ on the Alberta System and the monthly average aggregate amount of Excess CO₂ received by NGTL for the months of February 2007 through August 2007. Since February 2007, the average aggregate amount of Excess CO₂ received by NGTL has been below the stipulated CO₂ Service Cap level of 155 10³m³/d. NGTL currently contracts for CO₂ removal and in the six months beginning February 1, 2007, the volume of expensed CO₂ removal has averaged 13.1 10³m³/d.

¹ Excess CO₂ is defined as the volume of CO₂ in excess of 2% contained in gas receipts with a CO₂ concentration exceeding 2%.
