**Issue:**

FT-A rate

**Request:**

Please explain the purpose and principles behind the development and design of the FT-A.

**Response:**

The modifications made to FT-A and FCS in the Alberta System 2003 Tariff Application as approved by the Board in Decision 2003-051 respond to the requirements of the Board and NGTL customers for increased direct cost accountability and price transparency associated with intra-Alberta delivery service by ensuring sufficient revenue is generated to recover costs associated with the provision of intra-Alberta delivery service.

---

**FGA-NGTL-002**

---

**Reference:**

Section 6.0, Appendix A, Table 6.1-3, Row 5

**Issue:**

FT-A rate

**Request:**

- (a) Please provide the calculation of the  $\$0.65/10^3\text{m}^3$  FT-A rate
- (b) Please confirm that this proposed rate of  $\$0.65/10^3\text{m}^3$  for 2004 is an increase from the FT-A rate charged in 2003.
- (c) If yes, please provide the 2003 rate and the reasons for the proposed increase.

**Response:**

- (a) The calculation is provided at page 25 in Appendix A of Section 6.0 of the Application.
- (b) Confirmed.
- (c) The 2003 rate was  $\$0.57/10^3\text{m}^3$ . The rate increase is attributable to an increase in the cost of service associated with metering.

FGA-NGTL-003

REVISED February 2004

---

**Reference:**

Section 6.0, Appendix A, Table 6.1-3, Row 5

**Issue:**

The FT-A rate

**Request:**

- (a) Please provide a list of delivery points to be charged the FT-A in 2004.
- (b) What is the forecast revenue to be generated from the FT-A in 2004?
- (c) Please provide a breakdown of the forecast revenue to be generated from the FT-A in 2004, by customer type (i.e. utility, industrial, etc.).
- (d) Please provide detailed examples of the calculation of the FT-A Charge for customers in 2004.

**Response:**

- (a) The requested information is provided in Attachment FGA-NGTL-003.
- (b) NGTL has forecasted ~~\$7.0~~\$6.4 million for 2004 as per the February 2004 Update.
- (c) NGTL does not have a revenue breakdown by type of customer that holds the FT-A contract.
- (d) The forecasted revenue is the result of the forecasted FT-A volume multiplied by the proposed FT-A rate. (~~29,480~~26,969  $10^3\text{m}^3/\text{d}$  \* 365 days \*  $\$0.65/10^3\text{m}^3$ ). The calculation of the rate for 2004 is provided at page 25 in Appendix A of Section 6.0 of the Application as per the February 2004 Update.

**Reference:**

Section 6.0, Appendix A, Table 6.1-3, Row 12

**Issue:**

FCS Charge

**Request:**

- (a) Please provide a list of facilities and/or delivery points that will be charged the FCS in 2004.
- (b) What is the forecast revenue to be generated from the FCS in 2004?
- (c) Please provide a breakdown of the forecast revenue to be generated from the FCS in 2004, by type of customer.
- (d) Please provide detailed examples of the calculation of the FT-A Charge for customers for 2004.

**Response:**

- (a) The FCS charge is calculated at the end of the year. At this time NGTL does not know what facilities will not meet the minimum annual volume (MAV) requirement and thus incur an FCS charge. It will be a subset of the stations provided in the response to FGA-NGTL-003(a).
- (b) NGTL has forecasted \$5.4 million for 2004. This is based on an estimate of the volumes to be delivered through these facilities in 2003 and the 2003 Annual Cost of Service calculated for these facilities as described in Attachment A of Rate Schedule FCS. The actual revenue will not be known until the end of 2004.

---

**FGA-NGTL-004**

---

(c) The forecasted revenue by type of customer is:

<b>Type of Customer</b>	<b>Forecasted Revenue for 2004</b>
Industrial	\$759,051
Utility	\$1,180,007
Producer	\$3,060,942
Storage	\$400,000
Total	\$5,400,000

(d) Refer to the response to FGA-NGTL-003(d).

---

**FGA-NGTL-005**

---

**Reference:**

Minimum Average Volume (MAV)

**Request:**

- (a) Please provide a list of delivery points whose rates will be effected by MAV.
- (b) Please provide detailed examples of all the types of rate calculations that include MAV.

**Response:**

- (a) The FCS charge is calculated at the end of the year. At this time NGTL does not know what facilities will not meet the minimum annual volume (MAV) requirement and thus incur an FCS charge. It will be a subset of the stations provided in the response to FGA-NGTL-003(a).
- (b) The FCS service is the only rate schedule that includes the MAV. The calculation of the FCS charge is provided in detail in Attachment 1 of the FCS Service Agreement available in Rate Schedule FCS of NGTL's Tariff.

---

**FGA-NGTL-006**

---

**Reference:**

Extension Annual Volume (EAV) obligation, Decision 2003-051

**Issue:**

NGTL stated (Decision 2003-051, pp.13-14) that, “the proposed changes to FCS provided for a substantial increase in customer accountability through a change to the MAV, and the introduction of the EAV.” (emphasis added)

**Request:**

- (a) Please explain the purpose and principles behind the development and design of the EAV.
- (b) Please provide a list of facilities and/or delivery points that will be charged the EAV in 2004.
- (c) What is the forecast revenue to be generated from the EAV in 2004?
- (d) Please provide a breakdown of the forecast revenue to be generated from the EAV in 2004, by type of customer.
- (e) Please provide detailed examples of the calculation of the EAV for customers for 2004.

**Response:**

- (a) Please refer to the response to FGA-NGTL-001.
- (b) The FCS charge is calculated at the end of the year. At this time NGTL does not know what facilities will not meet the extension annual volume (EAV) requirement and thus incur an FCS charge. It will be a subset of the stations provided in the response to FGA-NGTL-003(a).
- (c) NGTL is not forecasting any FCS revenue as a result of the EAV calculation for 2004.

---

**FGA-NGTL-006**

---

- (d) Not applicable.
- (e) The FCS service is the only rate schedule that includes the EAV. The calculation of the FCS charge is provided in detail in Attachment 1 of the FCS Service Agreement available in Rate Schedule FCS of NGTL's Tariff.

---

**FGA-NGTL-007**

---

**Reference:**

Section 6.0, Appendix A

**Request:**

Why is this COSS included in a Phase 1 Application?

**Response:**

As stated on page 1 of Section 6 of the Application “A Cost of Service Study, prepared in 2003, attached as Appendix A, has been provided to illustrate the methodology used to determine the FT-A rate for 2004.”

---

**FGA-NGTL-008**

---

**Reference:**

Section 6.0, Figure 6.1-1 on p.1

**Request:**

Please provide a background explanation for the rates LRS-1, LRS-2 & LRS-3.

**Response:**

The LRS rates were established upon Board approval of the individual LRS Services in Decisions U97096, U99042 and 2002-043.

---

**FGA-NGTL-009**

---

**Reference:**

Section 6.0, Figure 6.1-1 on p.2

**Request:**

Why does the contract demand for delivery (2,737.31 Bcf) not match the contract demand for receipt (2,744.61 Bcf) in the above referenced figure?

**Response:**

The contract demand for delivery is the annual quantity of firm transportation (FT-D) that is forecast for 2004. The contract demand for receipt is the annual quantity of firm transportation (FT-R) that is forecast for 2004. There is no direct relationship between the amount of FT-D contract and the amount of FT-R contract.

---

**FGA-NGTL-010**

---

**Reference:**

Section 6.0, Appendix A, Figure 6.1-3 on p.2

**Request:**

What is the difference between FT-R and FT-RN demand rates?

**Response:**

The FT-RN rate is 110% of the FT-R rate. Illustrative FT-R and FT-RN rates are listed in Attachment 1 of Table 6.1-3 of the Application.

### Reference:

Section 6.0, Appendix A, Sub-section 3.2.2, Allocation of non-direct costs to major functions, General Plant Costs (pp.10-11)

“Field Offices, Service Centres and Vehicles costs were allocated to compression, metering and transmission because they support the maintenance of the pipeline system. The following average percentage splits of annual maintenance costs were used as allocators:

50% to compression  
35% to metering  
15% to pipes.

A footnote states that these are historical averages based on actual maintenance costs.

**Request:**

Please provide the background calculation of these historical averages.

**Response:**

The tables below provide the source for these historical averages.

Facilities Maintenance - Maintenance Costs									
	1989	1990	1991	1992	1993	1994	1995	1996	Total
Pipes	6,703	9,642	10,155	8,597	9,433	8,720	10,939	11,619	75,808
Compressors	30,863	34,641	36,928	31,063	32,150	30,955	32,270	34,164	263,034
Meter Stations	20,178	23,007	23,723	24,322	24,072	23,264	23,952	24,066	186,584
Total	57,744	67,290	70,806	63,982	65,655	62,939	67,161	69,849	525,426

[illegible]

---

**FGA-NGTL-012**

---

**Reference:**

Section 6.0, Appendix A, Sub-section 3.2.2, Allocation of non-direct costs to major functions, The Working Capital Account Costs (pp.11)

Materials and supplies inventory costs were allocated based on the following percentage splits, provided by field experts:

73% to compression  
8% to metering  
19% to transmission

**Request:**

Please provide the rationale and background data which supports the opinion of the “field experts” in this matter.

**Response:**

Materials and supplies inventory were categorized as:

Compression: field inventory stores and compression related items  
Metering: field maintenance locations and measurement related items  
Pipeline: construction stores

The breakdown in the table below is based on 2001 data:

---

**FGA-NGTL-012**

---

<b>Location</b>	<b>\$ Amount (Millions)</b>	<b>Function</b>	<b>Percentage</b>
Airdrie Central Stores	10.6	Compression	40.5%
Compressor Sites	4.7	Compression	18.0%
Airdrie Surplus	3.9	Compression	14.9%
	19.2		73.4%
Field Maintenance Offices	1.7	Metering	6.5%
Redcliff	0.2	Metering	0.8%
Didsbury	0.1	Metering	0.3%
Empress	0.1	Metering	0.2%
	2.1		7.8%
Construction Stores	2.6	Pipeline	10.0%
Pipe Facilities	2.3	Pipeline	8.8%
	4.9		18.8%
Total Materials & Supplies Inventory	<b>26.2</b>		<b>100%</b>

The same relationship was used for 2002.

---

**FGA-NGTL-013**

---

**Reference:**

Section 6.0, Appendix A, Table 6-A/6-B, p.26/27

**Issue:**

The meter station count is shown to be 1,109

**Request:**

Please provide the breakdown of the 1,109 meter stations by customer.

**Response:**

2002 information is only readily available for receipt and export border points. This information is provided in Attachment FGA-NGTL-013.

**FGA-NGTL-014**

---

**Reference:**

Section 6.0, Appendix A, Table 6-A/6-B, p.26/27

**Issue:**

The average commodity volume at all meter stations is shown to be 23,696 MMcf/d. NGTL states that, "Metering volumes include receipt, intra & border delivery, storage and extraction volumes"

**Request:**

Please provide the breakdown of the 23,696 MMcf/d by customer.

**Response:**

Customer specific volume information is confidential. Accordingly, NGTL cannot provide the requested information.

---

**FGA-NGTL-015**

---

Section 7.4.7 Utility Tap Facility Deferral Account

**Issue:**

“This account will capture amounts paid by NGTL in 2004 to Local Distribution Companies (LDCs) for reimbursement of costs incurred by the LDCs to repair facilities affected by gas quality-related incidents.”

**Request:**

- (a) Please describe the process whereby an LDC may apply for reimbursement of these costs.
- (b) Please describe the types of costs that may be applied for.
- (c) If a dispute were to develop regarding whether or not a certain cost is to be reimbursed to the LDC, how would that dispute be resolved and who would be the arbiter?

**Response:**

- (a) Upon an incident, the LDC will inform the local NGTL office, assess whether there is a gas quality related root cause, complete an incident report and summarize cost to return the station to normal operations. Then an assessment is required by the LDC to ensure the following information is gathered and provided to NGTL for its assessment of the application to the deferral account.
  - 1. Copy of the Gas Quality Incident Report;
  - 2. Copies of the invoices being submitted for reimbursement;
  - 3. Assessment of Meter Capacity versus peak load volumes;
  - 4. Verification of station maintenance activity; and
  - 5. Signed letter requesting a review, indicating who should receive the reimbursement.

---

**FGA-NGTL-015**

---

- (b) The cost validation, as stated in the Description and Attributes of the Gas Delivery Quality- Gas quality at Utility Tap Facilities Process (Resolution T2000-16), pertains to the following criteria:
- The cleaning and return to normal service of the affected LDC facility which means all facilities owned by the LDC that are immediately downstream of the custody transfer point including, but not beyond, the first measurement equipment. In a case where a gas quality incident is an extraordinary circumstance as determined by NGTL whereby further contamination of the LDC facility past the first meter requires clean-up beyond what is considered normal accumulation, then this additional cost may also be included;
  - Incidents where the NGTL Tariff gas specs were exceeded at the Receipt Point(s); and
  - Temporary facility costs for the LDC to maintain service including staff and contracted services.
- (c) Any dispute can be referred to the Board for adjudication.

---

**FGA-NGTL-016**

---

**Reference:**

Section 7.4.7 Utility Tap Facility Deferral Account

**Issue:**

“NGTL will accrue costs incurred in 2004 in this deferral account and will seek to recover such costs as part of its 2005 revenue requirement.”

**Request:**

- (a) From whom will NGTL recover these costs?
- (b) Does NGTL foresee any difficulty collecting these costs from the appropriate parties?
- (c) If so, what recourse does NGTL have to collect these costs from the appropriate parties?
- (d) Might NGTL have to absorb some of these costs?

**Response:**

- (a) These costs are included in the annual revenue requirement and recovered in the various service rates according to the methodology illustrated in Figure 6.1-1 of the Application.
- (b) No.
- (c) Not applicable.
- (d) The revenue requirement and all its components are approved by the Board. Therefore the Board will determine whether the methodology described in FGA-NGTL-16(a) is appropriate.

---

**FGA-NGTL-017**

---

**Issue:**

Abandonment and Removal of Small Pipes

**Request:**

- (a) Please provide the 2002 actual costs, revenues and profit for the abandonment and removal of small pipes (2" or less) related to LDC facilities, broken down by materials, labour and overhead.
- (b) Please provide the 2003 and 2004 forecast costs, revenues and profit for the abandonment and removal of small pipes (2" or less) related to LDC facilities, broken down by materials, labour and overhead.
- (c) Are there acceptable alternative methods for abandonment and removal of small pipes (2" or less) related to LDC facilities that would prove less costly for LDCs?

**Response:**

- (a) In 2002, NGTL did not incur any costs or record any revenues related to the abandonment or removal of small pipes related to LDC facilities.
- (b) In 2003, NGTL expects to incur approximately \$4,000 in costs to remove small pipe related to LDC facilities. These forecasted costs include approximately \$3,500 for labour, \$300 for materials, and \$200 for overhead. NGTL will fully recover these costs and, as such, will not record any revenue or profit related to this project.
- (c) NGTL uses the most cost-effective and appropriate method for the abandonment and removal of small pipes related to LDC facilities.
