

Consolidations Available for FT-R, FT-D and LRS Schedules of Service

What is consolidation?

Consolidation of schedules of service allows the combination of two or more schedules into one schedule

Under what conditions can I consolidate?

- FT-R, FT-D and LRS schedules of service only
- The location, expiry date and price point/LRS term must be the same.

What are the benefits?

Consolidating these schedules will result in fewer schedules to manage, renew, etc.

How do I request this?

If you would like to consolidate schedules please submit a request to NGTL_contracting@tcenergy.com You may specify a location(s) and certain schedules (assuming the conditions listed above are met) or have us consolidate all possible schedules. We will send you a report showing the old schedules and the new consolidated schedules with Agreement to Consolidate Schedules of Service that must be executed and returned.

If you have any questions, please contact your Contract Analyst or NGTL_contracting@tcenergy.com
