March 21, 2005

Alberta Energy and Utilities Board 640-5th Avenue S.W. Calgary, Alberta T2P 3G4

## By Electronic Filing

## Attention: Mr. Robert Heggie, Executive Manager, Utilities Branch

Dear Sir:

#### Re: NOVA Gas Transmission Ltd. (NGTL) 2005-2007 Revenue Requirement Settlement Application

Enclosed for filing with the Board is NGTL's 2005-2007 Revenue Requirement Settlement Application. Pursuant to the Board's letter of March 18, 2005, NGTL understands that the withdrawal of its 2005 General Rate Application Phase 1 is effective by virtue of this filing.

NGTL will notify its customers, members of its Tolls, Tariff, Facilities and Procedures Committee and the participants in the settlement negotiations of the filing of this Application. Electronic copies of the Application will be available on NGTL's website at: http://www.transcanada.com/Alberta/regulatory\_info/active\_rates\_services\_filings.htm

All notices and communications related to this matter should be directed to Klaus Exner by e-mail at klaus\_exner@transcanada.com and to alberta\_system@transcanada.com, or by phone at 920-5978 and to Patrick Keys by e-mail at patrick\_keys@transcanada.com or by phone at 920-6237.

Yours truly,

**NOVA Gas Transmission Ltd.** a wholly owned subsidiary of TransCanada PipeLines Limited

**IN THE MATTER OF** the *Gas Utilities Act*, R.S.A. 2000, c. G-5, as amended, and the Regulations under it;

**IN THE MATTER OF** the *Public Utilities Board Act*, R.S.A. 2000, c. P-45, as amended, and the Regulations under it; and

**IN THE MATTER OF** an Application by NOVA Gas Transmission Ltd. to the Alberta Energy and Utilities Board for an Order approving the NGTL 2005-2007 Revenue Requirement Settlement.

#### 2005-2007 REVENUE REQUIREMENT SETTLEMENT APPLICATION

NOVA Gas Transmission Ltd. (NGTL) applies to the Alberta Energy and Utilities Board (Board) under Section 45 of the *Gas Utilities Act* and the provisions of Informational Letter IL 98-04 Revised, being the Revised Negotiated Settlement Guidelines Tolls, Tariffs, and Terms and Conditions of Service, for an Order:

- (a) approving the NGTL 2005-2007 Revenue Requirement Settlement (Settlement), provided as Appendix A of this Application, in its entirety; and
- (b) granting such further and other relief as NGTL may request or the Board may determine is appropriate.

In support of its Application, NGTL provides and relies on the information in the Application, including the attached evidence, schedules and explanatories, and any additional information that NGTL may file, as directed or permitted by the Board.

Respectfully submitted.

March 21, 2005 Calgary, Alberta

## 1 1.2 INTRODUCTION

8

14

## 2 Q1. What is the purpose of this Application?

A1. NGTL seeks Board approval of the 2005-2007 Revenue Requirement Settlement
(Settlement). The Settlement establishes the mechanisms through which the 20052007 Alberta System Revenue Requirements will be determined, based on a
combination of fixed and flow-through cost elements. A copy of the Settlement is
provided in Appendix A.

9 The Settlement is the product of negotiations between NGTL and interested Alberta 10 System stakeholders. It represents an acceptable balance of interests amongst the 11 parties, and results from compromises in the diverse interests and positions of the 12 parties. Consequently, the components of this Settlement are inextricably linked and 13 are presented to the Board for approval as a package.

NGTL explains in this Application the basis of the Settlement and how it meets the
interests of the parties and the general public interest.

## 1 2.0 NEGOTIATED SETTLEMENT PROCESS

## 2 Q1. Describe the events leading up to this Application.

3 A1. Following a period of years in which the Alberta System's annual revenue requirement was determined through negotiated settlements, the Alberta System 4 revenue requirement for 2004 was determined through a General Rate Application 5 (GRA). NGTL filed its 2004 GRA in fulfillment of its commitment in the 2003 6 7 Alberta System Revenue Requirement Settlement (ASRRS) and in compliance with the Board's subsequent direction in Decision 2003-051<sup>1</sup> to file a comprehensive 2004 8 GRA. Following a hearing on the 2004 GRA, in which interested parties had an 9 opportunity to examine all components of NGTL's 2004 revenue requirement, the 10 Board issued Decision  $2004-069^2$  establishing the basis for the 2004 revenue 11 12 requirement. On August 18, 2004, NGTL applied to the Board for approval to initiate negotiations 13 on a revenue requirement settlement for a period of up to five years, commencing 14 January 1, 2005. In Decision 2004-077,<sup>3</sup> issued September 10, 2004, the Board 15

approved NGTL's request, with the condition that the settlement period not exceed
 three years commencing January 1, 2005.

- 18 On November 8, 2004, by letter, NGTL invited members of the Tolls, Tariff,
- 19 Facilities and Procedures Committee (TTFP), parties to NGTL's 2004 GRA Phases 1
- and 2 and all Alberta System shippers to participate in the settlement negotiations.
- 21 The letter constituted notice of a meeting that was held on November 17, 2004, at
- 22 which time interested parties were asked to enter into a confidentiality agreement
- 23

with NGTL so that further discussions could be conducted on a confidential and

<sup>&</sup>lt;sup>1</sup> Alberta Energy and Utilities Board, Decision 2003-051, NOVA Gas Transmission Ltd., 2003 Revenue Requirement and Tariff Settlement Applications (June 24, 2003), page 27.

<sup>&</sup>lt;sup>2</sup> Alberta Energy and Utilities Board, Decision 2004-069, NOVA Gas Transmission Ltd., 2004 General Rate Application Phase 1 (August 24, 2004), (EUB Decision 2004-069).

<sup>&</sup>lt;sup>3</sup> Alberta Energy and Utilities Board, Decision 2004-077, NOVA Gas Transmission Ltd., Request for Approval to Commence Negotiations (September 10, 2004).

without prejudice basis. A copy of the letter is provided as Appendix B. 1 At a subsequent meeting on December 10, 2004, NGTL provided a detailed 2 3 settlement proposal to stakeholders. Following this meeting, NGTL filed its 2005 GRA Phase 1 with the Board on December 15, 2004. The 2005 GRA Phase 1 4 provided interested parties with additional background information. NGTL stated in 5 the transmittal letter that it was continuing settlement negotiations and that it would 6 7 amend or replace the 2005 GRA Phase 1 if a settlement was achieved. 8 Ongoing negotiations meetings and discussions were held throughout January and February. On January 25, 2005, the Board issued a Notice of Hearing for the 2005 9 10 GRA Phase 1, including a schedule for adjudication. On February 10, 2005, NGTL requested that the Board revise the 2005 GRA Phase 1 schedule to allow parties to 11 12 complete the settlement discussions. The Board approved this request on February 11, 2005 and issued a revised schedule. 13 On February 24, 2005, NGTL notified the Board that it had reached an agreement in 14 principle on a negotiated settlement and requested that the Board suspend the GRA 15 process while it finalized a settlement agreement with stakeholders. The Board 16 approved NGTL's request on February 25, 2005 and directed NGTL to provide an 17 update on the status of the settlement agreement by March 15, 2005. 18 19 On March 15, 2005, NGTL advised the Board that the Settlement had been executed. NGTL also stated that it intended to file this Settlement Application by the end of 20 21 March and, as a consequence, NGTL sought the Board's approval to withdraw the 22 2005 GRA Phase 1. On March 18, 2005, The Board approved the withdrawal of the 2005 GRA Phase 1, on the basis that the withdrawal be effective concurrent with the 23 filing of this Application. 24

## Q2. Did NGTL follow the general requirements of the Board's Negotiated Settlement Guidelines under IL 98-04 Revised in reaching the 2005-2007 Settlement?

A2. Yes. NGTL believes that the settlement process was open and fair. It provided an appropriate forum for all interested parties to participate meaningfully in discussions on a confidential and without prejudice basis. NGTL also provided appropriate notice of meetings and made available sufficient information to facilitate understanding and review of the issues being negotiated. Additionally, an EUB staff member served as an observer at various negotiations meetings.

## 9 Q3. Which parties participated in the settlement negotiations?

- A3. Lists of parties that attended the November 17, 2004 meeting and that executed
   confidentiality agreements to participate in the negotiations process are included in
   Appendix C. The participants represent a broad cross-section of Alberta System
   stakeholders, including producers, marketers, intra-Alberta industrial and residential
   customers and ex-Alberta delivery LDC customers, either directly and/or through
   their representative associations.
- Q4. Are there any issues related to the 2005-2007 Alberta System revenue
   requirements that were not resolved in negotiations?
- 18 A4. No. The parties resolved all components of the 2005-2007 revenue requirements.
- 19 Q5. Does the Settlement address any other issues?

A5. Yes. The Settlement does provide for parties to enter into industry-wide discussions during the term of the Settlement with respect to the terminal net negative salvage issue and for NGTL to consult with shippers, during the term of the Settlement, on the issue of its long term debt funding position.

1	Q6.	Who are the signatories to the Settlement?
2	A6.	The Settlement was signed by:
3		Anadarko Canada Corporation;
4		• BP Canada Energy Company;
5		• Canadian Association of Petroleum Producers (CAPP);
6		• Cargill Power & Gas Markets;
7		• EnCana Corporation;
8		• Industrial Gas Consumers Association of Alberta (IGCAA);
9		• NOVA Gas Transmission Ltd.;
10		• Pacific Gas & Electric Company;
11		• Puget Sound Energy, Inc.;
12		• Small Explorers and Producers Association of Canada (SEPAC);
13		• Talisman Energy Inc,;
14		• Terasen Gas Inc.; and
15		Utilities Consumer Advocate.
16		BP Canada Energy Company and CAPP also provided letters of comment on the
17		Settlement, copies of which are provided in Appendix D.
18	Q7.	Did all of the participants in the settlement discussions execute the Settlement?
19	A7.	No. Certain participants in the settlement discussions chose not to sign the
20		Settlement. Some of them decided to have their support represented through their

1	respective industry associations rather than by signing the Settlement directly. The
2	following participants have indicated to NGTL that they either support or do not
3	oppose the Settlement:
4	Alberta Urban Municipalities Association;
5	• ATCO Pipelines;
6	• Avista Energy Canada, Ltd;
7	Burlington Resources Canada Partnership;
8	Cascade Natural Gas Corporation;
9	• Consumers' Coalition of Alberta (CCA);
10	• Consumer Group;
11	• Coral Energy Canada Inc.;
12	• Nexen Inc.;
13	• Northwest Natural Gas Company; and
14	• Petro Canada Oil and Gas.
15	Certain of the above parties have provided letters of comment stating their position on
16	the Settlement, copies of which are provided in Appendix D.

## 1 Q8. Is the Settlement opposed by any of the participants in the negotiations?

- A8. No. NGTL understands that all of the participants either support or do not oppose the
  Settlement.
- 4 **Q9.** Does that conclude NGTL's evidence in this section?
- 5 A9. Yes.

## 1 3.0 TERMS OF THE 2005-2007 SETTLEMENT

2 **3.1 Key Terms of the Settlement** 

#### 3 Q1. What is the general structure of the Settlement?

- A1. The Settlement encompasses all elements of the Alberta System revenue requirement,
  but does not extend to any rate design, accountability, services or competitive issues.
  The Settlement establishes methodologies for calculation of the 2005, 2006 and 2007
  Alberta System revenue requirements, based on fixed and flow-through cost
  components and the use of deferral accounts for various revenues and costs.
- For the Settlement to be binding on any party, it must be approved by the Board in its
  entirety. The Settlement results from and reflects compromises by the participants
  respecting their different interests and positions on the various components.
  Consequently, all components of the Settlement are inextricably linked and must be
  treated as a single package.

## 14 Q2. Which cost components are fixed under the Settlement?

- A2. The Settlement defines fixed annual cost amounts for Operating Costs and Other
   Costs for 2005 to 2007. Operating Costs encompass all operating, maintenance and
   administration costs that NGTL will incur during the term of the Settlement that are
   not otherwise specified as Other Costs or flow-through costs. Other Costs are
   comprised of foreign exchange on interest payments, uninsured losses and
   amortization of severance costs incurred in previous years under the terms of the
   2003 ASRRS.
- The fixed cost components are "black box" amounts. The amounts do not represent any particular expense type, other than those specifically identified in the Settlement. Similarly, parties to the Settlement have not attributed any specific amount to any particular expense type within the negotiated "black box" amounts.

1		Any variances between actual results and the negotiated fixed cost amounts are the				
2		responsibility of NGTL. Specifically, NGTL is at risk for any expenses incurred				
3		above the fixed cost amounts and will receive the benefit of any cost savings				
4		achieved.				
5	Q3.	Which cost components are flow-through under the Settlement?				
6	A3.	Flow-through cost components consist of:				
7		• return on equity;				
8		• debt expenses;				
9		• depreciation;				
10		• property, income and large corporation taxes;				
11		• transportation by others;				
12		• regulatory hearing costs;				
13		• pipeline integrity costs (expense);				
14		• annual foreign exchange amortization amount;				
15		• CO <sub>2</sub> management service costs (expense);				
16		• audit adjustment; and				
17		• deferral accounts.				
18		The flow-through costs in this settlement are reasonable estimates of the actual costs				
19		that, as prudently incurred, will flow through to shippers. The mechanisms for the				
20		determination of some of the flow-through costs are detailed in the Settlement. For				
21		example, return on equity will be calculated using the formula for determining the				

1		annual generic rate of return on common equity established in Decision $2004-052^1$ on
2		deemed common equity of 35%.
3		Annual amounts for the flow-through costs will be based on NGTL's forecast of the
4		reasonable expenses it will prudently incur to operate the Alberta System at existing
5		service levels. NGTL will use deferral accounts to record and account for variances
6		between forecast and actual flow-through costs.
7	3.2	Annual Revenue Requirements
8	Q4.	What is the 2005 revenue requirement as determined under the provisions of the
9		Settlement?
10	A4.	The 2005 revenue requirement is \$1,160 million. It includes the amounts identified
11		in Appendix 1 to the Settlement, the audit adjustment and the 2004 deferral account
12		balances. A schedule detailing the composition of the 2005 revenue requirement is
13		provided in Appendix E.
14	Q5.	How does the 2005 revenue requirement compare to the approved 2004 revenue
15		requirement and the revenue requirement applied-for in the 2005 GRA Phase 1?
16	A5.	NGTL provides a schedule in Appendix E that compares the 2005 revenue
17		requirement to those approved for 2004 and previously applied-for in the 2005 GRA
18		Phase 1. The 2005 revenue requirement is approximately \$85 million lower than the
19		approved 2004 revenue requirement and approximately \$12 million lower than the
20		revenue requirement in the 2005 GRA Phase 1.
21	Q6.	What is the impact of the Settlement on 2005 rates, tolls and charges?
22	A6.	Final 2005 rates, tolls and charges cannot be determined until both this Application
23		and the 2005 GRA Phase 2 have been determined. NGTL presently intends to file its
24		2005 GRA Phase 2 by April 1, 2005 in accordance with the Board's direction in

<sup>&</sup>lt;sup>1</sup> Alberta Energy and Utilities Board, Decision 2004-052, Generic Cost of Capital (July 2, 2004), page 32.

1		Decision 2004-097. <sup>2</sup> However, NGTL provides in Appendix G illustrative 2005 rates,					
2		tolls and charges calculated in accordance with the rate design approved by the Board					
3		in Decision 2004-097, forecast 2005 contract demand and throughput quantities, as					
4		outlined in Appendix F, and the 2005 revenue requirement provided in Appendix E.					
5	Q7.	What rates, tolls and charges for services is NGTL currently charging?					
6	A7.	NGTL is currently charging interim rates, tolls and charges for service on the Alberta					
7		System (2005 Interim Rates), which the Board approved in Order U2004-446. <sup>3</sup>					
8	Q8.	Will NGTL amend the 2005 Interim Rates to incorporate the revised 2005					
9		revenue requirement pending the Board's determination of this Application and					
10		NGTL's 2005 GRA Phase 2?					
11	A8.	No. The rates, tolls and charges determined using the revenue requirement resulting					
12		from the Settlement would be only 3% lower than the 2005 Interim Rates. Therefore,					
13		NGTL intends to continue charging the existing 2005 Interim Rates until both this					
14		Application and the 2005 GRA Phase 2 have been determined.					
15	Q9.	Have the revenue requirements for 2006 and 2007 been determined?					
16	A9.	No. Revenue requirement amounts for 2006 and 2007 are provided in Appendix 1 of					
17		the Settlement for illustrative purposes. The fixed cost components shown in the					
18		Settlement will not change; however, the flow-through cost components shown will					
19		be updated when the 2006 and 2007 revenue requirements are finalized. The					
20		applicable deferral account balances will also be calculated at that time.					

 <sup>&</sup>lt;sup>2</sup> Alberta Energy and Utilities Board, Decision 2004-097, NOVA Gas Transmission Ltd., 2004 General Rate Application Phase 2 (October 26, 2004), page 19.
 <sup>3</sup> Alberta Energy and Utilities Board, Order U2004-446, NOVA Gas Transmission Ltd., 2005 Interim Rates,

Tolls and Charges (December 14, 2004).

1	Q10.	How will the final revenue requirements for 2006 and 2007 be calculated?				
2	A10.	NGTL will calculate forecast 2006 and 2007 revenue requirements and provide this				
3		information to the parties to the Settlement by November 1, 2005 for the 2006				
4		revenue requirement, and by November 1, 2006 for the 2007 revenue requirement.				
5		By March 15 of each year, the forecast revenue requirement will be updated to reflect				
6		the actual results from the prior year. This information will be provided to the parties				
7		to the Settlement.				
8	Q11.	How will rates for 2006 and 2007 be calculated?				
9	A11.	For each year, NGTL will calculate interim rates, tolls and charges based on the				
10		forecast revenue requirement, a forecast of firm transportation contract demand				
11		quantity and throughput, and the approved rate design in place at the time. On or				
12		before December 1 of the prior year, the interim rates, tolls and charges will be				
13		provided to interested parties and filed with the Board for approval.				
14		The final rates, tolls and charges for each year will be calculated and provided to				
15		interested parties and filed with the Board for approval on or before March 15 of each				
16		year. Such final rates shall enable NGTL to collect its annual revenue requirement,				
17		recognizing amounts collected under interim rates.				
18	3.3	Deferral and Reserve Accounts				
19	Q12.	What deferral and reserve accounts will be used for 2005, 2006 and 2007?				
20	A12.	NGTL will use the following deferral accounts for 2005, 2006 and 2007:				
21		• Revenue;				
22		• CO <sub>2</sub> Management Service Costs; and				
23		• Flow-through Costs.				

1	The Revenue deferral account will continue to be used for the same purpose it was				
2	used for in 2004 and will consist of:				
3	1. Variances in revenue resulting from actual Firm Transportation Contract				
4	Demand Revenue differing from the forecast of Firm Transportation Contract				
5	Demand revenue used in establishing the applicable year's rates. This				
6	includes all variances related to all Firm Transportation.				
7	2. Variances in revenues resulting from actual Interruptible Transportation				
8	Services revenue differing from the forecast of Interruptible Transportation				
9	Services revenue used in establishing the applicable year's rates. This				
10	includes all variances from interruptible receipt and interruptible delivery				
11	revenues net of alternate access, as well as intra-Alberta delivery service,				
12	Facilities Connection Service, Pressure/Temperature Service and Other				
13	Services.				
14	The CO <sub>2</sub> Management Service deferral account will continue to be utilized in the				
15	same manner it was used in 2004. It will capture the variances between forecast and				
16	actual revenues and forecast and actual costs attributable to the CO <sub>2</sub> Management				
17	Service in the applicable year. Any incentive earned by NGTL under the provisions				
18	of the CO <sub>2</sub> incentive mechanism will also be recorded in this account.				
19	The Flow-through Costs deferral account will capture the variances between forecast				
20	and actual costs for all flow-through cost components of the revenue requirement,				
21	with the exception of costs related to the CO <sub>2</sub> Management Service. A breakdown of				
22	the deferral account balance by cost component will be provided in the annual rate				
23	calculation process.				
24	The Regulatory Hearing Costs reserve account established in Decision 2004-069 will				
25	be continued for the term of the Settlement. As directed by the Board, NGTL will not				

carry a Regulatory Hearing Costs reserve account balance in excess of \$5 million at
 any time.<sup>4</sup>

#### 3 Q13. How will the deferral accounts work?

- A13. NGTL will record the variances between the forecast revenue or cost and the actual
  amounts collected or incurred for each revenue or cost item in the appropriate deferral
  account on a monthly basis. Carrying charges or credits will be calculated, at the
  Bank of Canada's Bank Rate plus 1.5%, on the balance in each deferral account at the
  end of each month and recorded in the respective deferral account.
- 9 NGTL will include the balances of the deferral accounts in the calculation of the
  10 subsequent year's revenue requirement.

#### 11 Q14. How will NGTL dispose of the 2004 deferral account balances?

- A14. NGTL has calculated the 2004 deferral account balances based on the 2004 revenue
   requirement amounts approved by the Board in Decision 2004-102.<sup>5</sup> The balances,
   including applicable carrying charges or credits, are included in the 2005 revenue
   requirement as per the terms of the Settlement.
- 16 **3.4 Conclusion**
- 17 Q15. Why does NGTL believe that the Board should approve the Settlement?

# A15. NGTL submits that the Settlement is reasonable and fair to the parties and in the general public interest. Specifically:

Participants in the negotiations represented a broad cross-section of Alberta
 System stakeholders, including producers, marketers, intra-Alberta industrial and
 residential customers and ex-Alberta delivery LDC customers. The participants

<sup>&</sup>lt;sup>4</sup> EUB Decision 2004-069, page 47.

<sup>&</sup>lt;sup>5</sup> Alberta Energy and Utilities Board, Decision 2004-102, NOVA Gas Transmission Ltd., 2004 General Rate Application Phase 1 Compliance Filing (November 17, 2004).

1	are sophisticated parties who are knowledgeable about the operations of the
2	Alberta System and include interveners who were active in Phase 1 of the 2004
3	GRA. Their aggregate support of the Settlement is a strong basis on which the
4	Board can reasonably conclude that the Settlement is in the interests of the
5	stakeholders specifically and the public generally.
6	• After an extended period of determining revenue requirements under negotiated
7	settlements, the 2004 GRA provided all parties with the opportunity to review the
8	components of NGTL's revenue requirement in detail and determine the
9	appropriateness of the costs being incurred to provide transportation service on
10	the Alberta System. NGTL believes that the in-depth review undertaken in the
11	2004 GRA provided parties with a sufficient level of understanding of and
12	comfort with NGTL's current cost structure and forecasting methodologies to
13	enable them to support a multi-year revenue requirement settlement.
14	Additionally, the comprehensive, detailed 2005 GRA Phase 1 filed in December
15	2004 was available to for review by participants.
16	• The 2005 revenue requirement fixed under the terms of the Settlement will also
17	result in lower costs to shippers than in 2004. Illustrative amounts for 2006 and
18	2007 indicate that costs are expected to continue to remain lower than 2004 costs.
19	• The Settlement provides a reasonable apportionment of risk on the fixed and
20	flow-through cost components. NGTL is incented to achieve cost efficiencies
21	which may result in sustained reductions in Operating Costs.
22	• The Settlement will result in greater regulatory efficiency and effectiveness than a
23	traditional litigated hearing process. It defines a method for determining revenue
24	requirements for a three-year period, which will decrease the time and resources
25	that would otherwise be required by all parties to determine revenue requirement
26	in each of the three years.

1		• The Settlement will provide greater rate certainty for shippers than a litigated
2		GRA process by enabling NGTL to determine annual revenue requirements
3		earlier in each of the years of the Settlement.
4		• The Settlement contains appropriate reporting and audit provisions to ensure
5		proper information disclosure and accountability to parties to the Settlement and
6		the Board.
7		• The Settlement allows for the determination of revenue requirements that will
8		enable NGTL to operate the Alberta System safely, reliably, and cost effectively.
9		• The Settlement is consistent with the existing law and policies of the Board.
10		Accordingly, for these reasons, NGTL requests that the Board approve the Settlement
11		in its entirety. NGTL submits that the Board, in approving the Settlement, will
12		validate the significant efforts of the participants and will affirm the Board's stated
13		commitment to the negotiated settlement process and its objectives of achieving
14		greater regulatory efficiencies and effectiveness through that process.
15	Q16.	Does that conclude NGTL's evidence in this section?

16 A16. Yes.

APPENDIX A: NGTL 2005-2007 REVENUE REQUIREMENT SETTLEMENT

## NGTL 2005-2007 Revenue Requirement Settlement March 1, 2005

## 1.0 OVERVIEW

This Settlement encompasses all elements of NGTL Revenue Requirement and does not extend to any rate design, accountability, services or competitive issues. This Settlement is based on establishing certain revenue requirement amounts and methodologies for calculation of the 2005, 2006 and 2007 Alberta System revenue requirements, including establishing deferral accounts for various revenues and costs. Rates for 2005, 2006, and 2007 will be based on the revenue requirement for that year and calculated in accordance with the methodology in effect at the time as approved by the EUB.

This Settlement fixes the overall revenue requirement amount for 2005 as set out in Appendix 1, which forms part of this Settlement. This Settlement also fixes some components of the 2006 and 2007 revenue requirements and provides for the overall revenue requirements for 2006 and 2007 to be determined through specified methodologies.

## 2.0 TERM

The term of this Settlement is three years commencing January 1, 2005 until December 31, 2007.

## 3.0 REVENUE REQUIREMENT COMPONENTS

The revenue requirement will be calculated for each year based on inclusion of certain costs that are fixed pursuant to this Settlement ("fixed cost components"), and a forecast of remaining costs that will flow through ("flow through cost components"), adjusted for appropriate deferral account balances.

## 3.1 Fixed Cost Components

The following cost amounts will be fixed for the three year period. Any variance between these forecasts and actual costs incurred will be for the account of NGTL.

## (a) Operating Costs

Operating costs for 2005, 2006, and 2007, which include severance costs, will be fixed at the levels specified below. Actual severance costs for 2007 will be amortized over a two year period, 2007 and 2008. Fifty percent (50%) of the actual severance costs for 2007, will be deferred to 2008, up to a maximum of \$2.5 million, and included in NGTL's 2008 revenue requirement.

2005 \$193 million2006 \$201 million2007 \$207 million

## (b) Other Costs

Other fixed cost components of the revenue requirement are foreign exchange on interest payments, uninsured losses, and amortization of severance costs incurred in the previous years under the terms of the 2003 Settlement. These costs for the three year period will be fixed as follows:

> 2005 \$6 million 2006 \$3 million 2007 \$5 million

#### 3.2 "Flow-through" Cost Components

The following cost amounts will be forecast at the beginning of each year and included in the calculation of revenue requirement. Any variance between the forecasts and actual costs incurred will be included in a deferral account and adjusted in the following year's revenue requirement. Carrying charges or credits on deferral accounts will be calculated using the Bank of Canada Bank Rate plus 1 1/2%.

## (a) Rate Base

There will be a single rate base that is forecast each year and includes all rate base items (base rate base, general plant and

maintenance capital, capacity capital, pipeline integrity, and  $CO_2$  capital).

## (b) Return on Equity

The return on equity is calculated annually using EUB formula on a deemed 35% equity component. For 2005, the forecast return on equity is \$148 million. For 2006 and 2007, the forecast return on equity will be calculated by multiplying the EUB approved return on 35% deemed equity by the weighted average rate base for each year and is estimated to be \$146 million and \$139 for 2006 and 2007 respectively.

## (c) Debt Expenses

Debt expenses will be calculated annually in the usual manner based on the average rate base, the terms of the existing long term debt and a forecast of unfunded debt costs. Debt expenses are forecast to be \$226 million, \$215 million, and \$202 million for 2005, 2006, and 2007 respectively.

## (d) Depreciation

The forecast depreciation expense will be calculated annually using the rates for individual asset classes included in the depreciation study filed in the NGTL 2004 GRA. The forecast depreciation expense for 2005 is \$304 million and is estimated to be \$285 million and \$282 million for 2006 and 2007 respectively.

## (e) Property, Income, and Large Corporation Taxes

Property taxes for 2005 are forecast at the 2004 level of \$71 million and are assumed, for the purpose of providing an estimate of NGTL's revenue requirement, to be \$71 million for each of 2006 and 2007. Income and Large Corporation taxes are calculated annually based on the EUB approved return on equity, the forecast weighted average rate base and applicable tax rates and other adjustments. For 2005 the forecast income and Large Corporation tax expense is \$140 million and is estimated to be \$132 million and \$131 million for 2006 and 2007 respectively.

## (f) Transportation by others

TBO costs will be forecast annually based on the following TBO arrangements:

Foothills Zone 6; Foothills Zone 7; Ventures Oil Sands Pipeline; Husky Kearl Lake; and

ATCO East Edmonton.

For 2005 the forecast TBO cost for these existing TBO arrangements is \$83,373,000 and is estimated to be \$93 million and \$91 million for 2006 and 2007 respectively. Costs associated with additional TBO arrangements, if any, will be flow through costs and added to the revenue requirement subject to the approval of the EUB.

## (g) Regulatory hearing costs

The regulatory hearing cost reserve account established in the 2004 GRA Decision will be continued. NGTL will not carry a hearing cost reserve balance in excess of \$5 million at any time. A forecast of the regulatory hearing costs will be included in the revenue requirement each year. For 2005 the forecast regulatory hearing cost amount is \$4,452,000 and is estimated to be \$2 million for each of 2006 and 2007..

## (h) Pipeline Integrity costs (expense)

Pipeline integrity expenses will be forecast annually. For 2005, the forecast pipeline integrity expense is \$19,923,000 and is estimated to be \$13 million and \$17 million for 2006 and 2007 respectively.

## (i) Annual Foreign Exchange Amortization Amount

The mechanism established through the 2001-2002 Alberta System Rate Settlement for amortizing foreign exchange gains and losses related to long-term debt will continue. The Annual Foreign Exchange Amortization Amount will be forecast annually, to amortize foreign exchange gains and losses on long-term debt over the life of that debt. For 2005, the forecast Annual Foreign Exchange Amortization Amount is \$1,620,000 and is estimated to be \$2 million for each of 2006 and 2007.

## (j) CO<sub>2</sub> Management Service costs (expense)

 $CO_2$  Management Service expenses will be forecast annually. For 2005 the forecast  $CO_2$  Management Service expense is \$2,678,000 and is estimated to be \$3 million for each of 2006 and 2007.

## 3.3 Audit Adjustment

The 2005 revenue requirement will be reduced by \$6,248,000 to reflect the TTFP Resolution T2001-03.

## 3.4 Deferral Accounts

All deferral accounts approved by the Board in Decision 2004-069 and established by NGTL will be continued and balances in these accounts will be included in the subsequent year's revenue requirement including 2004 balances being carried forward to 2005. Other deferral accounts will be established as necessary to provide for flow through treatment of all flow-through cost components listed in Section 3.2 above.

## 4.0 OTHER PROVISIONS

## 4.1 Incentive Compensation

Upon EUB approval of this Settlement, NGTL will withdraw its Motion to the Alberta Court of Appeal for Leave to Appeal EUB Decision 2004-069 and NGTL will not pursue a review and variance application on the EUB findings on either the 2004 Incentive Compensation or Long Term Incentive Compensation costs.

## 4.2 Allocation of TransCanada Costs to NGTL

During the term of this Settlement, if there is a substantive change to the methodology used in 2004 to allocate corporate costs to NGTL, NGTL will notify the parties and the parties will enter into good faith negotiations to determine the appropriate adjustment, if any, to the revenue requirement.

## 4.3 Service Levels

NGTL will maintain, at a minimum, its current services (i.e. FT-R, FT-D, FT-A, etc) subject to any changes approved by the EUB. In addition, NGTL will use reasonable efforts to maintain its current level of customer service.

## 4.4 Facilities Divestitures or Acquisitions

If, in any year during the term of this Settlement, NGTL either divests of or acquires assets that result in a net decrease or increase of NGTL's rate base by \$250 million or more and has a material impact on NGTL's Operating Costs, the parties will enter into good faith negotiations to determine the appropriate adjustment, if any, to the revenue requirement.

## 4.5 Reporting

On or before May 15<sup>th</sup> of each year following each of the Settlement years, NGTL will provide a report to the EUB and parties to this Settlement containing information which provides the same level of detail as the reporting package for the 2003 Alberta System Revenue Requirement Settlement. The report will also include a breakdown of TransCanada's corporate allocated costs to NGTL, the TransCanada Mainline, TransCanada's B.C. System, Foothills and Other.

## 4.6 Audit

The Tolls, Tariff, Facilities, and Procedures Committee (TTFP) may conduct an independent audit of this Settlement and will use reasonable efforts to complete it prior to December 15, 2008. The audit will verify compliance by NGTL with the terms of this Settlement and verify the validity of the information provided in the reporting packages. Subject to the execution of an acceptable confidentiality agreement by the auditor, NGTL will provide reasonable access to all necessary source data. The costs and expenses for the audit will be paid by NGTL and added to NGTL's subsequent year revenue requirement.

## 4.7 Net Negative Salvage

All parties agree to enter into industry wide discussions during the term of this Settlement on the terminal net negative salvage issue. Dispute resolution procedures referred to in Section 4.11 will not apply.

## 4.8 Long Term Debt

NGTL will consult with shippers, during the term of this Settlement, on the issue of its long term debt funding position. Dispute resolution procedures referred to in Section 4.11 will not apply.

## 4.9 Settlement Package

The parties agree that EUB approval of this Settlement in its entirety as a package is a requirement for this Settlement to be binding on any party. The terms and conditions of this Settlement have been negotiated and set no precedent nor shall they prejudice any position any party may take regarding the matters addressed in this Settlement in other proceedings or forums at any time.

## 4.10 Cost of Service Schedules

NGTL will, if requested by any party during its 2005 Phase 2 GRA process, provide forecast numbers for 2005 costs at the level provided in Tables 1 and 2 of its Cost of Service Study and include a breakdown of its forecast 2005 TBO costs.

## 4.11 Dispute Resolution

Any disputes under this Settlement that cannot be resolved through goodfaith negotiations within 45 days (or longer if agreed by the parties) may be referred to the EUB by any party or the parties may agree to an alternate dispute resolution process.

## 4.12 Confidentiality

All information exchanged in this Settlement process is confidential and is provided on a without prejudice basis. NGTL will file this Settlement with the EUB for approval and may disclose the terms and conditions of this Settlement, as it determines necessary, in a press release. 1.5

#### TO: All Interested Parties

FROM: NOVA Gas Transmission Ltd.

#### RE: 2005 Revenue Requirement Settlement Negotiations

On August 18, 2004, NOVA Gas Transmission Ltd. (NGTL) applied to the Alberta Energy and Utilities Board (Board) for approval to initiate negotiations with respect to its revenue requirement or components of its revenue requirement for a term of up to five years pursuant to the Board's Negotiated Settlement Guidelines. NGTL indicated that the scope and term of the negotiation would be addressed by the parties to the negotiations.

The Board approved NGTL's request to commence negotiations on September 10, 2004 provided that the settlement period not exceed three years commencing January 1, 2005. The scope, term, basis for and timing of settlement negotiations proposed by NGTL is outlined in Attachment 1. The Canadian Association of Petroleum Producers and the Industrial Gas Consumers Association of Alberta have indicated that they are prepared to enter into settlement discussions. The Board was informed by letter dated October 22, 2004 that NGTL remains committed to either filing a negotiated settlement or a General Rate Application (GRA) for Board approval on a timely basis and intends to do so before the end of 2004.

NGTL is inviting the members of the Tolls, Tariff, Facilities and Procedures Committee, parties to NGTL's 2004 GRA Phases 1 and 2 and all Alberta System Shippers to participate in the settlement negotiations. Pursuant to the Board's Negotiated Settlement Guidelines, NGTL is also inviting Board staff to observe the negotiations.

A meeting to present NGTL's settlement proposal and provide additional details and background information will be held on Wednesday, November 17, 2004 from 2:00 pm to 4:00 pm in Room 214 (+15 level) at TransCanada Tower, 450 – 1 Street SW, Calgary. Please respond to this invitation by notifying Sharon Wright at 403-920-7016 or by email at sharon\_wright@transcanada.com by 4:00 pm on Friday, November 12, 2004 to ensure that all interested parties can be comfortably accommodated.

Sincerely,

0.0~

Steve Pohlod Director, Western Market Development Gas Transmission West

## Attachment 1

## NGTL Revenue Requirement Settlement (Post-2004) Proposed Scope and Timing

Scope:	The settlement would encompass all elements of NGTL's Revenue Requirement. It would not extend to rate design, accountability, services or competitive issues.							
Term:	The settlement would cover a two-year (2005/2006) or three year (2005-2007) period.							
Basis for Negotiation:	a) <b>Return on Equity:</b> Calculated in accordance with EUB Generic Cost of Capital Decision (EUB formula on deemed 35% equity component).							
	b) <b>Depreciation:</b> Based on rates supported by depreciation study filed by NGTL in the 2004 GRA. No provision for terminal net negative salvage. However, separate discussions that are not tied to the settlement would be initiated regarding this issue during the term of the settlement.							
	c) <b>Income Taxes:</b> Based on continuation of flow-through methodology with no amortization of existing deferred amounts.							
	d) <b>OM&amp;A:</b> Global amount to be determined by negotiating parties.							
Timing:	The parties to make reasonable efforts to reach a settlement in principle by November 30, 2004 with final documentation and filing targeted for December 15, 2004.

Dear Sir:

## RE: NGTL 2005-2007 REVENUE REQUIREMENT SETTLEMENT

This letter is to confirm that the Environment and Utilities Standing Committee of the Alberta Urban Municipalities Association (AUMA) has approved the settlement arrangements and recommended that the Board of Directors authorize execution of the settlement document which was attached to your letter of March 1, 2005.

We have every expectation that the AUMA Board will approve this settlement at its next meeting scheduled for March 24, 2005 and can advise that the AUMA will not oppose NGTL's application for approval of the negotiated settlement.

Yours truly,

BRYAN & COMPANY

Dear Mr. Pohlod:

#### Re: NOVA Gas Transmission Ltd. (NGTL) 2005-2007 Revenue Requirement Settlement

ATCO Pipelines (ATCO) has reviewed the NGTL 2005-2007 Revenue Requirement Settlement and it does not oppose this agreement as a settlement package. ATCO specifically supports the inclusion of the costs related to the ATCO East Edmonton Transportation By Others (TBO) Agreement in the 2005-2007 revenue requirements. While ATCO does have some concerns about other TBO agreements which are referred to in this settlement package, it appears that these concerns would be best addressed in either NGTL's 2005 Phase II Application or the Competitive Proceeding.

Yours truly,

 $\subset$

Dear Mr. S. Pohlod

#### Re: NGTL 2005 - 2007 Revenue Requirement Settlement

BP Canada Energy Company (BP Canada) is a large shipper on the NGTL system and was an active participant in the recent negotiations of the NGTL 2005 - 2007 Revenue Requirement Settlement (the Settlement) both on its own behalf and as a member of CAPP. BP has reviewed the settlement document and has decided that it will sign the Settlement as a show of support. In doing so however, given that many of the cost elements of the settlement are defined as flow through, BP Canada believes it is important to be clear with respect to its understanding of flow through costs in the settlement. In this regard, BP fully endorses the comment in the support letter from CAPP which states "flow through costs in this settlement are reasonable estimates of the actual costs that as prudently occurred will flow through to shippers".

If you have any questions or require any additional information, please call me at (403) 233-1569.

Sincerely,

Cheer & worky

Dear Steve:

#### Re: NGTL Settlement for 2005 to 2007

Attached please find the signed execution page for the NGTL settlement on behalf of the Canadian Association of Petroleum Producers (CAPP). As discussed, CAPP requests that in addition to this settlement document that NGTL include the following wording in the application for the settlement to the Alberta Energy and Utilities Board:

The flow through costs in this settlement are reasonable estimates of the actual costs that, as prudently incurred, will flow through to shippers.

We appreciate the hard work on behalf of NGTL and all stakeholders that went into achieving this settlement.

Sincerely,

Greg Stringham Vice President

Dear Sir:

#### RE: NGTL 2005-2007 REVENUE REQUIREMENT SETTLEMENT

This letter is to confirm that the Consumer Group were active participants in this process, through designated representatives, and to advise as to their position regarding the negotiated settlement.

The Public Institutional Consumers of Alberta (PICA), the Consumers' Coalition of Alberta (CCA) and the Federation of Alberta Gas Co-ops Ltd. and Gas Alberta Inc. (FGA) support the settlement that has been reached. Consultants for the remaining members, being the Alberta Urban Municipalities Association (AUMA) and the Aboriginal Communities (AbCom), have recommended support which is expected to be given in the ordinary course but, because of timing constraints, cannot be formally given at this time. They are, however, not opposed to the settlement and your application for approval by the Board.

Signed copies of the settlement agreement will be provided to you by the individual members.

Yours truly,

18	Total Flow-through Cost Components	1,046,195	967,250	960,958
19	Total Revenue Requirement	1,244,804	1,171,636	1,159,958

#### Notes:

<sup>(1)</sup> Other Costs include foreign exchange on interest payments, uninsured losses, and amortization of severance costs incurred in previous years under the terms of the 2003 Settlement.

<sup>(2)</sup> Included in return on equity, debt expenses, depreciation and property, income and Large Corporation taxes for 2005 under the terms of the Settlement.

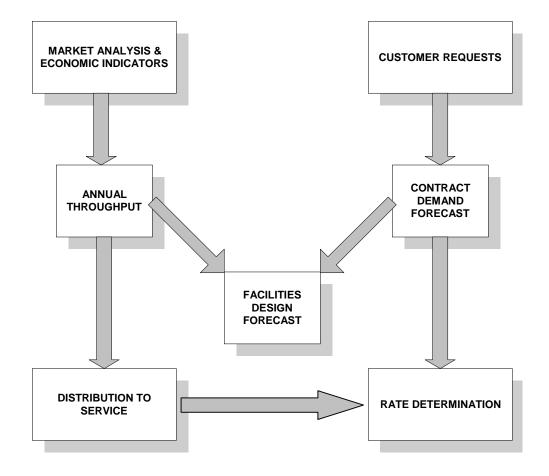

## APPENDIX F: 2005 CONTRACT DEMAND QUANTITY AND THROUGHPUT

#### 1 **1.0 CONTRACT DEMAND QUANTITY AND THROUGHPUT**

#### 2 **1.1 OVERVIEW**

- 3 In this Section, NGTL provides Contract Demand Quantity and Throughput information
- 4 for the purposes of determining the 2005 illustrative rates, tolls and charges in Appendix G.
- 5 The following flow chart outlines the interrelationship between Firm Transportation
- 6 Contract Demand, Annual Throughput, the Facilities Design Forecast, and rate

7 determination.

1	A forecast of Firm Transportation Contract Demand is used in the determination of the
2	Firm Transportation Demand rate, from which approximately 75 percent of Alberta
3	System revenue is recovered. Firm Transportation Contract Demand is forecast through
4	an assessment of customer requests for Firm Transportation at Receipt and Delivery
5	Points after consideration of contract renewals, current market conditions and
6	downstream pipeline expansions. The 2005 average Receipt Point Contract Demand
7	(which includes all Firm Services contracted at receipt points) is forecast to be 258.9
8	$10^{6}$ m <sup>3</sup> /d (9.19 Bcf/d). The 2005 average Export Delivery Point Contract Demand (which
9	includes all Firm Services contracted at export delivery points) is forecast to be 228.1
10	$10^{6} \text{m}^{3}/\text{d} (8.10 \text{ Bcf/d}).$

11 Throughput is forecast through an assessment of market demand in all markets served by 12 Canadian gas, a projection of the available capacity, and system load factors on all 13 interconnecting downstream pipelines. Considerable input in this process is received from 14 Alberta System customers, downstream pipeline operators, industry associations, and the 15 end-users of Canadian gas to determine the annual throughput forecast. The 2005 average 16 Annual Throughput for the Alberta System is forecast to be  $308.2 \ 10^6 \text{m}^3/\text{d}$  (10.94 Bcf/d).

The forecasts of the 2005 Annual Throughput and Firm Transportation Contract Demand are used in the determination of Interruptible Transportation service. The volume flowing under Interruptible Transportation service is determined by taking the total Annual Throughput and subtracting the volume forecast to flow under Firm Transportation service. Since not all Firm Transportation Contracts are fully utilized, projected system load factors are applied to determine the volume flowing under Firm Transportation service.

24 1.2 FIRM TRANSPORTATION

There are two primary categories of Firm Transportation Contracts (Receipt and
 Delivery) available on the Alberta System. Firm Transportation Receipt Point Contracts
 refer to quantities contracted by customers under Firm Transportation agreements that

enter the Alberta System at receipt meter stations. Firm Transportation Export Delivery 1 Point Contracts refer to quantities contracted by customers under Firm Transportation 2 agreements that leave the Alberta System to another province or state. Alberta Delivery 3 Point Contracts refer to quantities that leave the Alberta System to a market within 4 5 Alberta. 6 1.2.1 **Firm Transportation Receipt Point Contract Demand** 7 The Receipt Point Contract Demand forecast is determined after considering the total quantity contracted by customers under Firm Transportation agreements, and adjustments 8 for any new and expiring Contract Demand forecast to occur during 2005. Quantities used 9 in the forecast are based on information available as of the end of December 2004. The 10 adjustments result from the following: 11 1. New Receipt Point Contract Demand – Tables 1.2-1 and 1.2-2 include the 12 estimated quantity of new Firm Transportation contracts during 2005. 13 2. The non-renewal of Receipt Point Contract Demand – The Gas Transportation 14 15 Tariff requires customers to provide renewal commitments one year prior to the expiration of a contract. Contract renewals are known up until the end of 16 December 2005. Tables 1.2-1 and 1.2-2 include the non-renewal information. 17 The total Receipt Point Contract Demand illustrated in Table 1.2-1 shows a decrease 18 from 256.5  $10^{6}$  m<sup>3</sup>/d (9.11 Bcf/d) at the beginning of the year to 255.4  $10^{6}$  m<sup>3</sup>/d (9.06) 19 Bcf/d) at the end of the 2005. The 2005 average Receipt Point Contract Demand, which 20 is calculated as an average of twelve monthly forecasts, is forecast to be 258.9  $10^6 \text{m}^3/\text{d}$ 21 (9.19 Bcf/d). The monthly forecast detail used to calculate the 2005 average Receipt 22 23 Point Contract Demand forecast is shown in Table 1.2-2. Table 1.2-1 also includes figures for 2003 and 2004. 24

#### 1 **1.2.2** Firm Transportation Export Delivery Point Contract Demand

2	The Export Delivery Point Contract Demand is determined after considering the total
3	quantity signed by customers under Firm Transportation agreements for the 2004/05 and
4	2005/06 Gas Years, and adjustments for any new and expiring Contract Demand forecast to
5	occur during 2005. Components of the total 2005 Export Delivery Point Contract Demand of
6	228.1 $10^{6}$ m <sup>3</sup> /d (8.10 Bcf/d) are shown in Table 1.2-3. Figures are also included for 2003
7	and 2004. The monthly forecast detail used to calculate the 2005 average Export Delivery
8	Point Contract Demand forecast is shown in Table 1.2-4.

### 1 1.3 ANNUAL THROUGHPUT

## 2 1.3.1 Background

3	NGTL delivers gas to markets within Alberta and to downstream pipelines that connect to
4	other Canadian and United States markets. Throughput forecasts are prepared for the
5	following Export Border Points and Alberta Delivery Points on the Alberta System:
6 7	• Empress border, which connects with TransCanada's Mainline system and supplies gas to Canadian markets east of Alberta, the U.S. Midwest and U.S. Northeast markets;
8 9	• McNeill border, which connects with Foothills Pipe Lines (Sask.) Ltd., which, in turn, connects to Northern Border Pipeline Company and supplies the U.S. Midwest market;
10 11 12 13	• Alberta-B.C. border, which connects with TransCanada's B.C. System and supplies southern B.C. markets, and also connects with TransCanada's Gas Transmission Northwest (GTN) pipeline system and supplies the Pacific Northwest and California markets;
14 15	• Unity and Cold Lake borders, which connect with TransGas Limited and supply the Saskatchewan market;
16 17	• Gordondale and Boundary Lake borders, which connect with the Duke Energy Gas Transmission system and supply the British Columbia and Pacific Northwest markets;
18 19	• Alberta-Montana border, which connects with NorthWestern Energy's system and supplies the Montana market; and
20	Alberta delivery stations.
21	NGTL's forecast is based on economic growth assumptions in Canada and the United
22	States and an analysis of the aggregate supply, competition for supply with other
23	pipelines, gas market share expectations, taking into account customer delivery contracts,
24	downstream pipeline capacity, and competitiveness of Canadian gas versus other sources
25	of gas.

#### **Throughput by Alberta System Delivery Point** 1 1.3.2

- The following table summarizes the Annual Throughput forecast for the Alberta System by 2
- 3 Delivery Point. Total Alberta System deliveries are forecast to remain relatively flat as
- 4 illustrated in the following table.

Albert		ble 1.3-1 <sup>1</sup> Through	out Forec	cast			
		003		004		005	
	Actual		Actual		Forecast		
<b>Delivery Point</b>	Bcf	$10^{9}m^{3}$	Bcf	$10^{9}m^{3}$	Bcf	$10^{9}m^{3}$	
Empress	1,887	53.2	1,799	50.7	1,717	48.4	
McNeill	777	21.9	768	21.6	773	21.8	
Alberta/B.C.	673	19.0	743	20.9	761	21.5	
Other Borders	6	0.2	9	0.3	9	0.2	
Sub-Total Borders	3,344	94.2	3,320	93.5	3,260	91.9	
Intra-Alberta	539	15.2	589	16.6	699	19.7	
Total System (excl. Fuel)	3,883	109.4	3,909	110.1	3,960	111.6	
Fuel	34	1.0	34	0.9	33	0.9	
Total System (incl. Fuel)	3,917	110.4	3,943	111.1	3,992	112.5	

Note:

1. Numbers may not add due to rounding.

The 2005 throughput at Export Delivery Points is forecast to decrease by 1.8% from 5 2004, while throughput at Alberta Delivery Points is forecast to increase by 18.7 %. The 6 2005 total system Annual Throughput is forecast to increase only slightly (1.2 %) from 7 2004.

### 1 **1.3.3** Distribution of 2005 Annual Throughput to Services

Annual throughput is made up of gas volumes flowing under the following transportation
services:

4	• Receipt Services (FT-R, FT-RN, IT-R);
5	• Delivery Services (FT-D, FT-DW, STFT, FT-A, IT-D); and
6	• Other Transportation Services (LRS, LRS-2, LRS-3, FT-P).
7	The various Firm and Interruptible service options available to customers combined with
8	market volatility make it difficult to accurately forecast the utilization of these services. The
9	forecast distribution of throughput by service type shown in Tables 1.3-2 and 1.3-3 is based
10	upon historical use, trend analysis, and NGTL's judgment of its customers' use of these
11	services. The throughput numbers shown below correspond to the 2005 calendar year.
12	Throughput numbers used for calculating transportation rates are based on volumes forecast
13	for the 12-month period from December 1 to November 30.

## **Table 1.3-2<sup>1</sup>**

### 2005 Receipt Throughput by Service

Throughput Service Category	Bcf	10 <sup>9</sup> m <sup>3</sup>	Percent of Annual Throughput
Firm Transportation Receipts*	2,782	78.4	69.7%
Interruptible Transportation Receipts	756	21.3	18.9%

## APPENDIX G: 2005 ILLUSTRATIVE RATES, TOLLS AND CHARGES

### 1 1.0 2005 ILLUSTRATIVE RATES, TOLLS AND CHARGES

#### 2 1.1 RATES, TOLLS AND CHARGES SUMMARY

- 3 This Appendix contains the illustrative rates, tolls and charges for all services for 2005.
- 4 NGTL calculated these rates in accordance with the rate design approved by the Board in
- 5 Decision 2004-097 and contract demand and throughput quantities outlined in Appendix
- F and the 2005 revenue requirement determined under the terms of the Settlement and
  provided in Appendix E.
- 8 Figure 1.1-1 provides an overview of the rate calculation process.
- Table 1.1-1 provides a comparison by service type between the illustrative 2005 rates and
  the final 2004 rates. The differences are primarily due to the decrease in revenue
  requirement from 2004 to 2005.
- Table 1.1-2 (including Attachments 1 and 2) contains the illustrative rates based on a
- 13 January 1 implementation date.

<b>Table 1.1-1</b>
Comparison of 2004 and 2005 Illustrative Rates, Tolls and Charges

Revenue Variance (Overcollection)	6
Total Revenue Collected <sup>6</sup>	1,160.0
Revenue Requirement	1,160.0
Revenue Over Collection	0.0

128.4

1 Rate quoted is a volume weighted average for a three year contract term

2 Rate quoted is volume weighted average

3 Revenue quoted includes NGTL shareholder contribution

4 New service only forecasted in 2005.

5 Forecast quantity is net of Alternate Access

6 Revenue numbers have more than the one significant digit that is reported (variance in total is due to rounding)
