Re: NOVA Gas Transmission Ltd. (NGTL)
Application for 2006 Interim Rates, Tolls and Charges

NGTL hereby applies to the Alberta Energy and Utilities Board (Board) under Division 3 of the *Public Utilities Board Act* and under Parts 4 and 5 of the *Gas Utilities Act* for approval of interim rates, tolls, and charges for services on the Alberta System, effective January 1, 2006 (2006 Interim Rates).

NGTL currently provides services under 2005 interim rates, tolls and charges approved by the Board in Order U2004-446 (2005 Interim Rates). The Board stated in that Order that the 2005 Interim Rates shall be effective from January 1, 2005 until the same are superseded by a Board decision on the NGTL 2005 GRA Phase II. NGTL expects that the Board decision on the NGTL 2005 GRA Phase II will not be issued until early 2006.

In Decision 2005-057, the Board approved the 2005-2007 Revenue Requirement Settlement (the Settlement), which provides for the determination of interim and final rates tolls and charges for the period of the Settlement. Each year's revenue requirement is to be calculated based on certain costs fixed pursuant to the Settlement and a forecast of remaining costs that will flow through, adjusted for appropriate deferral account balances. This forecast revenue requirement, together with a forecast of firm transportation contract demand quantity and throughput, is to be used to calculate rates using the approved rate design in place at the time.

In this circumstance where a decision on the NGTL 2005 GRA Phase II is still outstanding and given approval for the methodology to establish the revenue requirement for 2006, NGTL submits that it is appropriate for the Board to approve new interim rates for 2006. NGTL will apply for final 2005 and 2006 rates in compliance with the Board's decision on the NGTL 2005 GRA Phase II.

The applied for 2006 Interim Rates are based on:

- The 2006 revenue requirement determined in accordance with the Settlement (Attachment A).
- The forecast 2006 contract demand quantities and throughput (Attachment B).
- The illustrative rate calculation (Attachment C) which uses the rate design approved by the Board in Decision 2004-097.
- A comparison of 2005 and 2006 illustrative rates, tolls and charges (Attachment D).
- The proposed 2006 Interim Rates (Attachment E).

The forecast of Transportation by Others (TBO) costs for 2006 includes the cost associated with a new TBO arrangement which will come into effect on April 1, 2006, pending Board approval of an application to be made by ATCO Pipelines (AP) for a non-standard rate. The transportation service provided by AP to NGTL using existing capacity on the AP Grande Cache Transmission pipeline, together with new facilities constructed by NGTL pursuant to EUB Approval Number 18765, provide the least cost capacity to transport new receipts for NGTL customers. NGTL will be seeking Board approval for this cost in accordance with the Settlement with its subsequent application for 2006 final rates, tolls and charges. Revenue collected under interim rates, as with all flow-through items, is subject to deferral.

NGTL believes that the proposed 2006 Interim Rates are reasonable. The revenue requirement is based on the latest estimate of costs for 2006 and is approximately \$50 million lower than the 2005 approved revenue requirement. Similarly the contract and volume information is based on the most recent information available for 2006. Based on these data, the average FT-R and FT-D interim rates will be \$0.144/mcf and an average interim export rate will be \$0.288/mcf. These are approximately 10% lower than the current rates.

NGTL will notify its shippers and the members of the Tolls, Tariff, Facilities and Procedures Committee of the availability of this application on TransCanada's Alberta System Website at the address below.

Calculation of 2006 Interim Revenue Requirement

NGTL has calculated a 2006 interim revenue requirement of \$1,107.7 thousand in accordance with the NGTL 2005-2007 Revenue Requirement Settlement as approved by EUB Decision 2005-057.

REVENUE REQUIREMENT SUMMARY (\$thousands)	2006	2005	Difference

Revenue Requirement	1,107,745	1,159,958	(52,213)

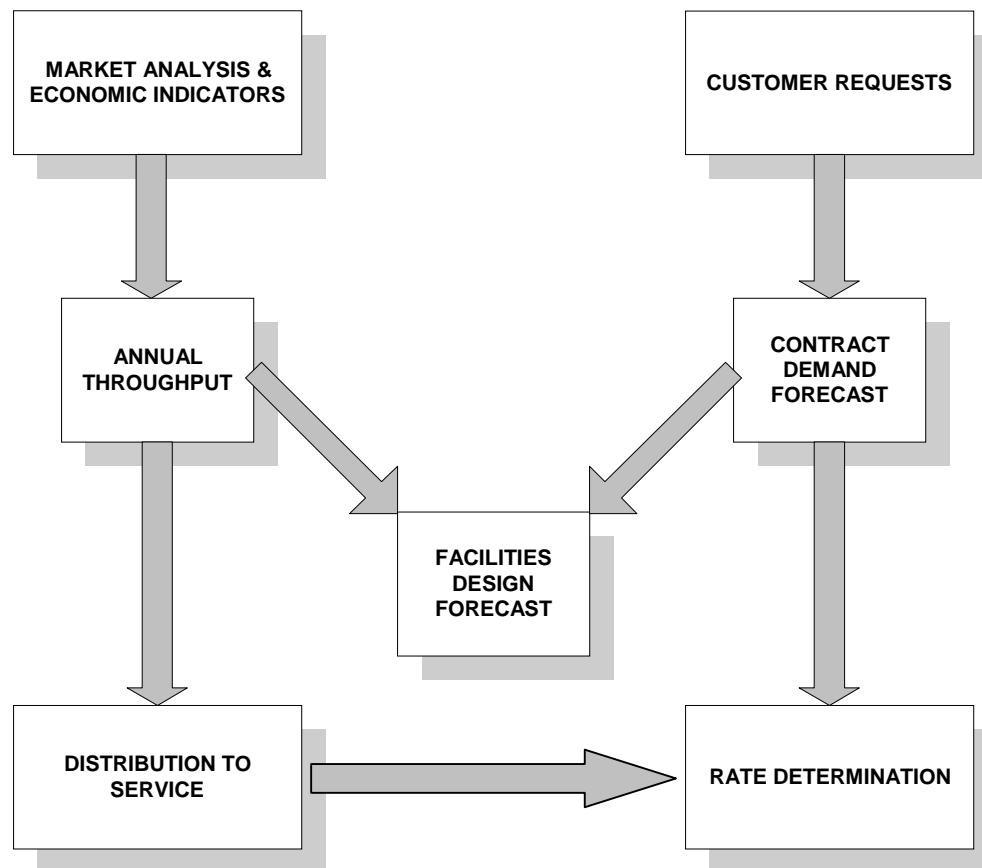

Note:

- (1) Fixed Costs set in accordance with the 2005-2007 Revenue Settlement.
- (2) Decreases due to lower rate base and rate of return on equity (9.50% in 2005 versus 8.92% in 2006).
- (3) Depreciation decreased because of a lower average depreciation rate due to the retirement of a number of computer assets (4.13% in 2005 versus 3.87% in 2006).
- (4) Increase in Property Taxes due to capital additions and increase in mill rates.
- (5) Transportation by others (TBO) have increased due to higher Foothills fuel costs, a full year for the East Edmonton TBO and the addition of the Smoky River TBO.
- (6) Regulatory hearing costs lower than previously anticipated as a result of NGTL reaching a three-year settlement with customers and a credit representing a balance in the regulatory hearing reserve account related to previous year.
- (7) There are two main factors in the increase in Pipeline Integrity costs; washout repairs due to the June 2005 flooding and an increase in hydrostatic testing and digs driven by SCC .
- (8) Deferrals increased primarily as a result of an over collection of revenue.

1.0 OVERVIEW

In this Section, NGTL provides Contract Demand Quantity and Throughput information for the purposes of determining the 2006 interim rates, tolls and charges (2006 Interim Rates). The following flow chart outlines the interrelationship between Firm Transportation Contract Demand, Annual Throughput, the Facilities Design Forecast, and rate determination.

Figure 1-1

1 A forecast of Firm Transportation Contract Demand is used in the determination of the
2 Firm Transportation Demand rate, from which over 70 percent of Alberta System
3 revenue is recovered. Firm Transportation Contract Demand is forecast through an
4 assessment of customer requests for Firm Transportation at Receipt and Delivery Points
5 after consideration of contract renewals, current market conditions and downstream
6 pipeline expansions. The 2006 average Receipt Point Contract Demand (which includes
7 all Firm Services contracted at receipt points) is forecast to be $267.2 \text{ } 10^6 \text{m}^3/\text{d}$ (9.48
8 Bcf/d). The 2006 average Export Delivery Point Contract Demand (which includes all
9 Firm Services contracted at export delivery points) is forecast to be $253.4 \text{ } 10^6 \text{m}^3/\text{d}$ (9.00
10 Bcf/d).

11 Throughput is forecast through an assessment of market demand in all markets served by
12 Canadian gas, a projection of the available capacity, and system load factors on all
13 interconnecting downstream pipelines. Considerable input in this process is received from
14 Alberta System customers, downstream pipeline operators, industry associations, and the
15 end-users of Canadian gas to determine the annual throughput forecast. The 2006 average
16 Annual Throughput for the Alberta System is forecast to be $314.2 \text{ } 10^6 \text{m}^3/\text{d}$ (11.15 Bcf/d).

17 The forecasts of the 2006 Annual Throughput and Firm Transportation Contract Demand
18 are used in the determination of Interruptible Transportation service. The volume flowing
19 under Interruptible Transportation service is determined by taking the total Annual
20 Throughput, and subtracting the volume forecast to flow under Firm Transportation
21 service. Since not all Firm Transportation Contracts are fully utilized, projected system
22 load factors are applied to determine the volume flowing under Firm Transportation
23 service.

24 **2.0 FIRM TRANSPORTATION**

25 There are two primary categories of Firm Transportation Contracts (Receipt and
26 Delivery) available on the Alberta System. Firm Transportation Receipt Point Contracts

refer to quantities contracted by customers under Firm Transportation agreements that enter the Alberta System at receipt meter stations. Firm Transportation Export Delivery Point Contracts refer to quantities contracted by customers under Firm Transportation agreements that leave the Alberta System to another province or state. Alberta Delivery Point Contracts refer to quantities that leave the Alberta System to a market within Alberta.

2.1 Firm Transportation Receipt Point Contract Demand

The Receipt Point Contract Demand forecast is determined after considering the total quantity contracted by customers under Firm Transportation agreements, and adjustments for any new and expiring Contract Demand forecast to occur during 2006. Quantities used in the forecast are based on information available as of end of October 2005. The adjustments result from the following:

1. New Receipt Point Contract Demand – Tables 2.1-1 and 2.1-2 include the estimated quantity of new Firm Transportation contracts during 2006.
2. The non-renewal of Receipt Point Contract Demand – The Gas Transportation Tariff requires customers to provide renewal commitments one year prior to the expiration of a contract. Contract renewals are known up until the end of October 2006. Tables 2.1-1 and 2.1-2 include the non-renewal information.

The total Receipt Point Contract Demand illustrated in Table 2.1-1 shows an increase from $264.3 \text{ } 10^6 \text{m}^3/\text{d}$ (9.38 Bcf/d) at the beginning of the year to $267.0 \text{ } 10^6 \text{m}^3/\text{d}$ (9.48 Bcf/d) at the end of the 2006. The 2006 average Receipt Point Contract Demand, which is calculated as an average of twelve monthly forecasts, is forecast to be $267.2 \text{ } 10^6 \text{m}^3/\text{d}$ (9.48 Bcf/d). The monthly forecast detail used to calculate the 2006 average Receipt Point Contract Demand forecast is shown in Table 2.1-2. Table 2.1-1 also includes figures for 2004 and 2005.

1 **3.0 ANNUAL THROUGHPUT**

2 **3.1 Background**

3 NGTL delivers gas to markets within Alberta and to downstream pipelines that connect to
4 other Canadian and United States market. Throughput forecasts are prepared for the
5 following Export Border Points and Alberta Delivery Points on the Alberta System:

- 6 • Empress border, which connects with TransCanada PipeLines Limited's Mainline
7 system and supplies gas to Canadian markets east of Alberta, the U.S. Midwest and
8 U.S. Northeast markets;
- 9 • McNeill border, which connects with Foothills Pipe Lines (Sask.) Ltd., which, in turn,
10 connects to Northern Border Pipeline Company and supplies the U.S. Midwest market;
- 11 • Alberta-BC border, which connects with TransCanada PipeLines Limited's B.C.
12 System and supplies southern B.C. markets, and also connects with TransCanada
13 PipeLines Limited's Gas Transmission Northwest (GTN) pipeline system and supplies
14 the Pacific Northwest and California markets;
- 15 • Unity and Cold Lake borders, which connect with TransGas Limited and supply the
16 Saskatchewan market;
- 17 • Gordondale and Boundary Lake borders, which connect with the Duke Energy Gas
18 Transmission system and supply the British Columbia and Pacific Northwest markets;
- 19 • Alberta-Montana border, which connects with NorthWestern Energy's system and
20 supplies the Montana market; and
- 21 • Alberta delivery stations.

22 NGTL's forecast is based on economic growth assumptions in Canada and the United
23 States and an analysis of the aggregate supply, competition for supply with other

1 pipelines, gas market share expectations, taking into account customer delivery contracts,
2 downstream pipeline capacity, and competitiveness of Canadian gas versus other sources
3 of gas.

10 The 2006 throughput at Export Delivery Points is forecast to decrease by 1.4 % from the
11 estimate for 2005, while throughput at Alberta Delivery Points is forecast to increase by 17.6
12 %. The 2006 total system Annual Throughput is forecast to increase by 1.5% from the
13 estimate for 2005.

1 **3.3 Distribution of 2006 Annual Throughput to Services**

2 Annual throughput is made up of gas volumes flowing under the following transportation
3 services:

- 4 • Receipt Services (FT-R, FT-RN, IT-R);
5 • Delivery Services (FT-D, FT-DW, STFT, FT-A, IT-D); and
6 • Other Transportation Services (LRS, LRS-2, LRS-3, FT-P).

7 The various Firm and Interruptible service options available to customers combined with
8 market volatility make it difficult to accurately forecast the utilization of these services. The
9 forecast distribution of throughput by service type shown in Tables 3.3-1 and 3.3-2 is based
10 upon historical use, trend analysis, and NGTL's judgment of its customers' use of these
11 services. The throughput numbers shown below correspond to the 2006 calendar year.
12 Throughput numbers used for calculating transportation rates are based on volumes forecast
13 for the 12-month period from December 1 to November 30.
